

TUTORIAL 5

LOGIN PAGE

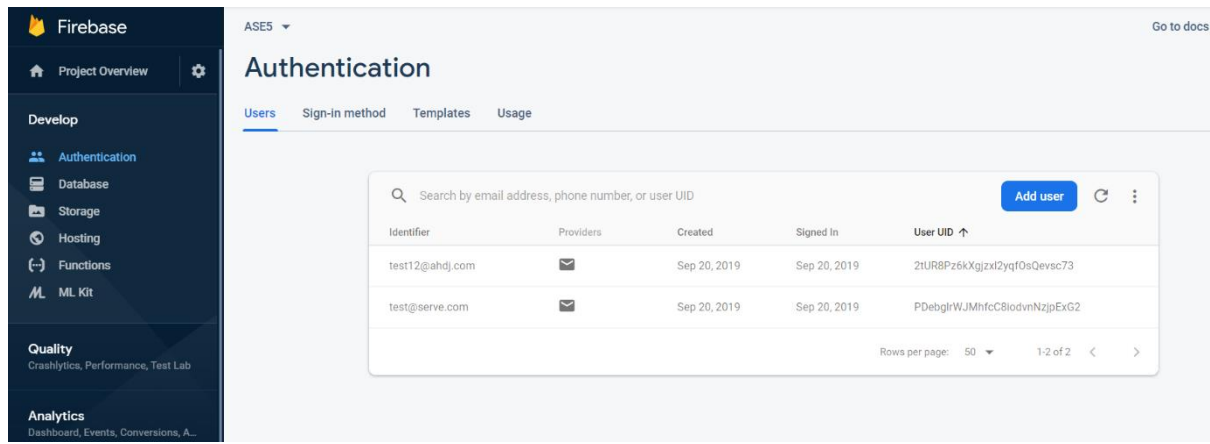

Used the same HTML page for Login. We have changed the firebase configurations in the app.module.ts file . The functionalities which were given are unchanged.

PLUGIN

I have used Geolocation plugin for this assignment in which it shows the Latitude and Longitude of current location. I have deployed this application in an Emulator.

FIRE BASE

Screenshot of the login id's which were created. The api configurations were configured in module file.

Contribution

Lab id: 3_2

Dukkipati Sri Sai Nithin Chowdary (Class Id 05)

UI part and plugin were done by me.

Rod, Skoglund (Class Id 23)

Api generation of FireBase
